Condoning Roach.

The New York Tribane says: It begins to look as if the Democrats of the United States Senate intended to make a stand against taking any action in the case of Reach, the man accused of embezzlemen ecently elected to the Senate from Dakota. The facts in the Roach case are pracilcally admitted and are open to no doubt whatever. In 1879 he was cashler of the Citizens' Bank of Washington. He appropriated large amounts of the bank's money, stated at \$64,000, but probably considerably in excess of that sum. When his theft was discovered he left the city, abandoning his wife and children. His condemen were liable for \$25,000, and that amount the bank recovered from them. It also seized some property be longing to Rose, from which, though

heavily mortgaged, about \$15,000 was realized after a period of years. The balance, washever it amounted to has never yet been paid or recovered These facts have become notorious. They BLAK! R.P.L.)WS & BRI WN admit of easy, accurate and incontestal proof. They are a matter of record, and

peasession of the United States Gover ment. That Reach should have had the audacity to make his appearance in Washington after such a career there, and while his defalcation was still unpaid, is simply amazing; but it is much less so than the seeming fact that he is to be allowed to brazen it out and that the Democratic party of the Senate, as a party, intenda to sustain him in this outrageous course.
It was a disgrace to the Democrats of

the Senate and to the party they represent that it should have been left to a Republican member to propose an investiga-tion into Roach's criminal transactions. If the case had been less clear, if the sources of information concerning it had been at a distance, less absolutely trustworthy, or at all open to the saspicion of partisan latrique or personal malice, there would still have been no excuse for ignor-ing the scandal. When partisanship has become so violent and so devoid of conscience as to make Senators willing to sit in the highest council of the Nation with a man whom they know to be a runaway embezzler, partisanship has gone just one

EMIGRANTS MOVING. Large Numbers Going Through the City and Across the State. On board the Flying Yankee which are

rived in this city yesterday afternoon half an hour late were 150 emigrants who went on to Boston and other points. A large number of them are now on the move this way and by the Canadian Pacific railway to western points. Every precaution is taken during the passage through Maine regarding those who come to Halifax from abroad in order to guard against the cholera.

An officer accompanies the Canadian Pacific trains through the State and sees that the regulations are carried out. The doors of the cars are locked at McAdani and are kept closed until the State border is passed. Other measures are also taken which are very proper under the circumstances. Too many precautions cannot be taken and the officers mean to see that nothing is omitted.

Every Sunday a special train over the Canadian Pacific takes large numbers of emigrants across the State, as many as 800 having gone one Sunday recently John Goldthwnit was appointed and The same precautions are observed reconfirmed a member of the local Board of garding those who come this way, and they are to be enforced as long as there is the least danger from the introduction of the dread disease.

Capt. Sherwood B. Ives, of the Yale

varsity craw has made public the contents of the much talked-of cablegram which the Yale anay received from Oxford a week ago last Saturday, the day following the great Oxford-Cambridge race on the Thames.

The cablegram said, in substance, that in international boat race would be out of the question this year. In other words, Oxford, the English champion, has de clibed the joint challenge from Yale and Harvard, sent some three weeks 190.

When the cablegram was received the Yale officials supposed that Oxford would also send a letter stating her reply more felly. Such a letter ought to have been received last flaturday, or yesterday at the litest, but, despite all reports to the content of the Oxford.

The reason for the Oxford refusal, although not explained in the cablegram is obvious. The majority of the men, who rowed in the Oxford boat against. The leading article in the April St Nicholas is undoubtedly Mr. Stedman's paper on New York—and a most worthy leader it is. Harry Fenn brings forward next a contrasting paper, The Story of Whittier's Snowbound, an account of the artist's visit to the poet when he was commissioned to illustrate the homely New Eugland poem. There is abundance of hunor, fun and brightness in the remaining pages of this number; the truty humorous poem What the Lord High Chamberlain Said, the real, old-fashioned fairy tale Prince Cam and the Fairles, the slightly boastful sketn of The Largest Kite in the World, the exciting Walrus-Hunt in Arctic Seas, by one of the Peary Rollet Expedition, the delightful Herford poem The Gifted Ant, and the catchy melodious rhyme and music Granger Grind furnish forth a magazine which finds in its own former numbers the competition most diffiguit to meet at each new issue. missioned to illustrate the homely New

Castoria

"Castoria is an excellent medicine for chil dren. Mothers have repeatedly told me of its good effect upon their children" Da. G. C. Oscore

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria in stead of the various quack nostrimis which are destroying their leved ones, by forning optim morphilae southing syrup and other hurful agents down their throats, thereby sending them to premature graves.
